

ARThouse

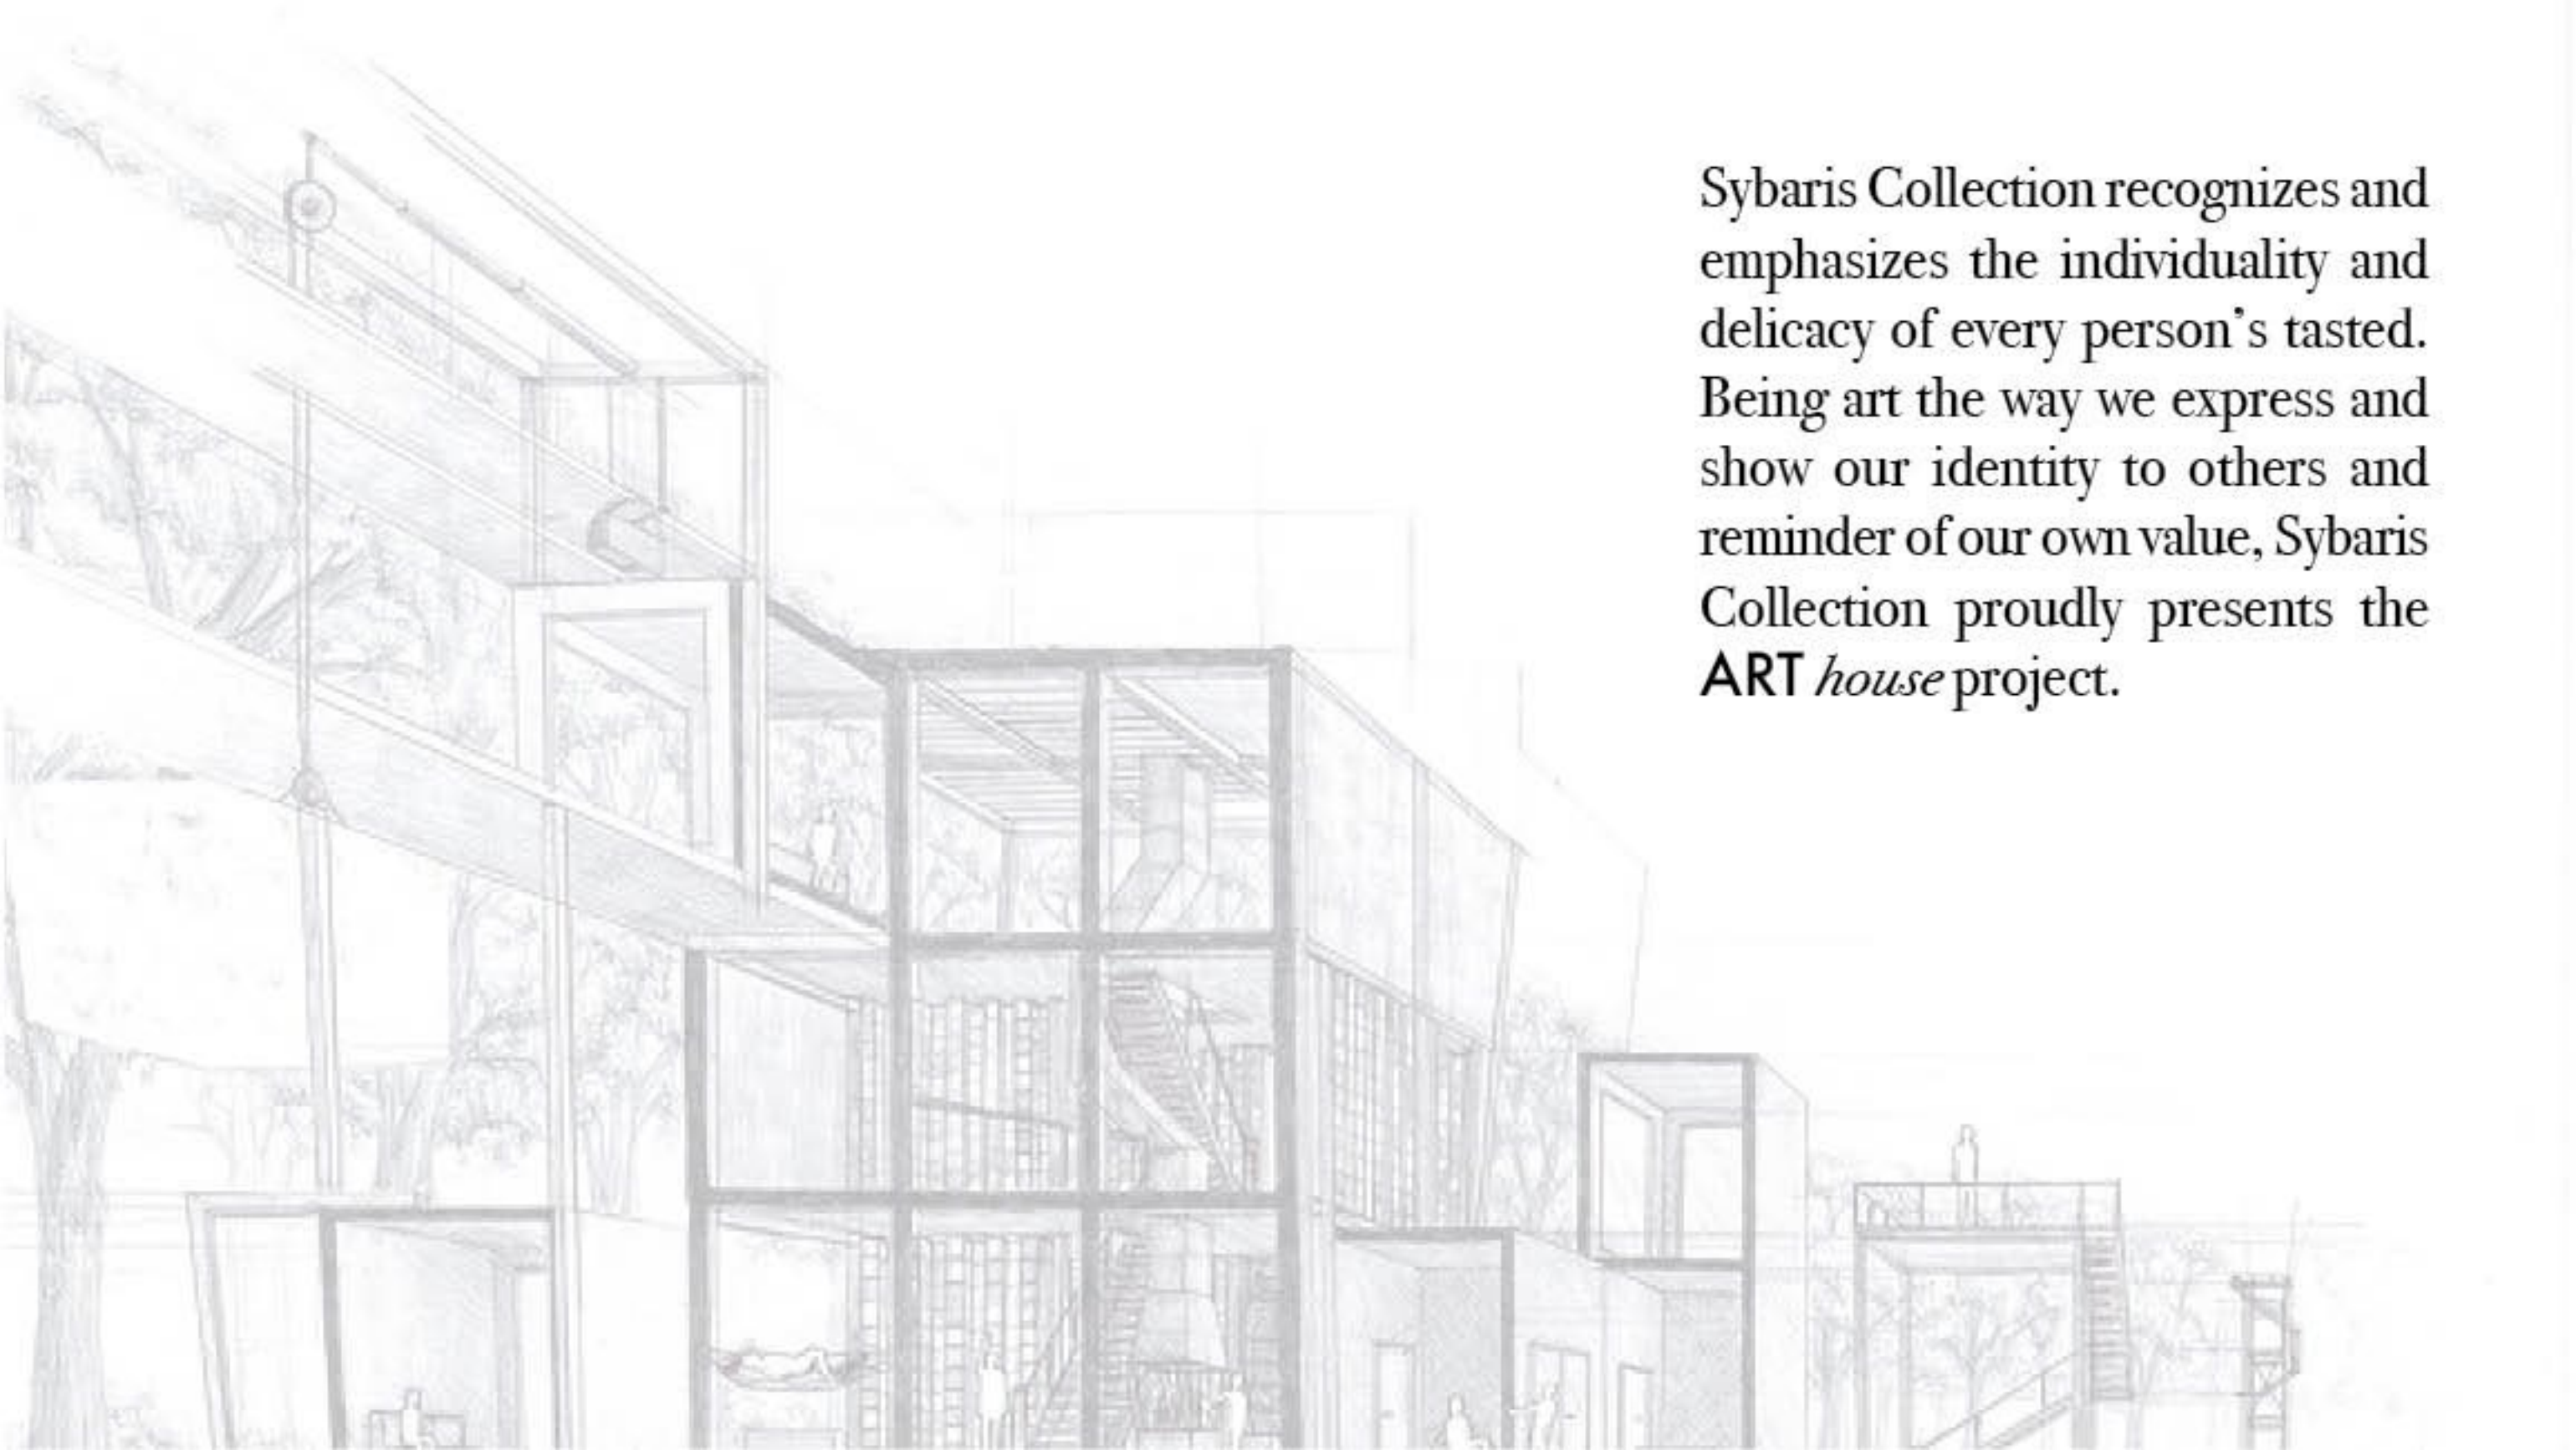

A project by SYBARIS

Sybaris Collection's purpose and mission is to become the instrument that allows you to *release your taste*. Every apartment, every office, every hallway, every house, any space is just another canvas waiting to be invested with necessary elements that distinguish it from the rest.

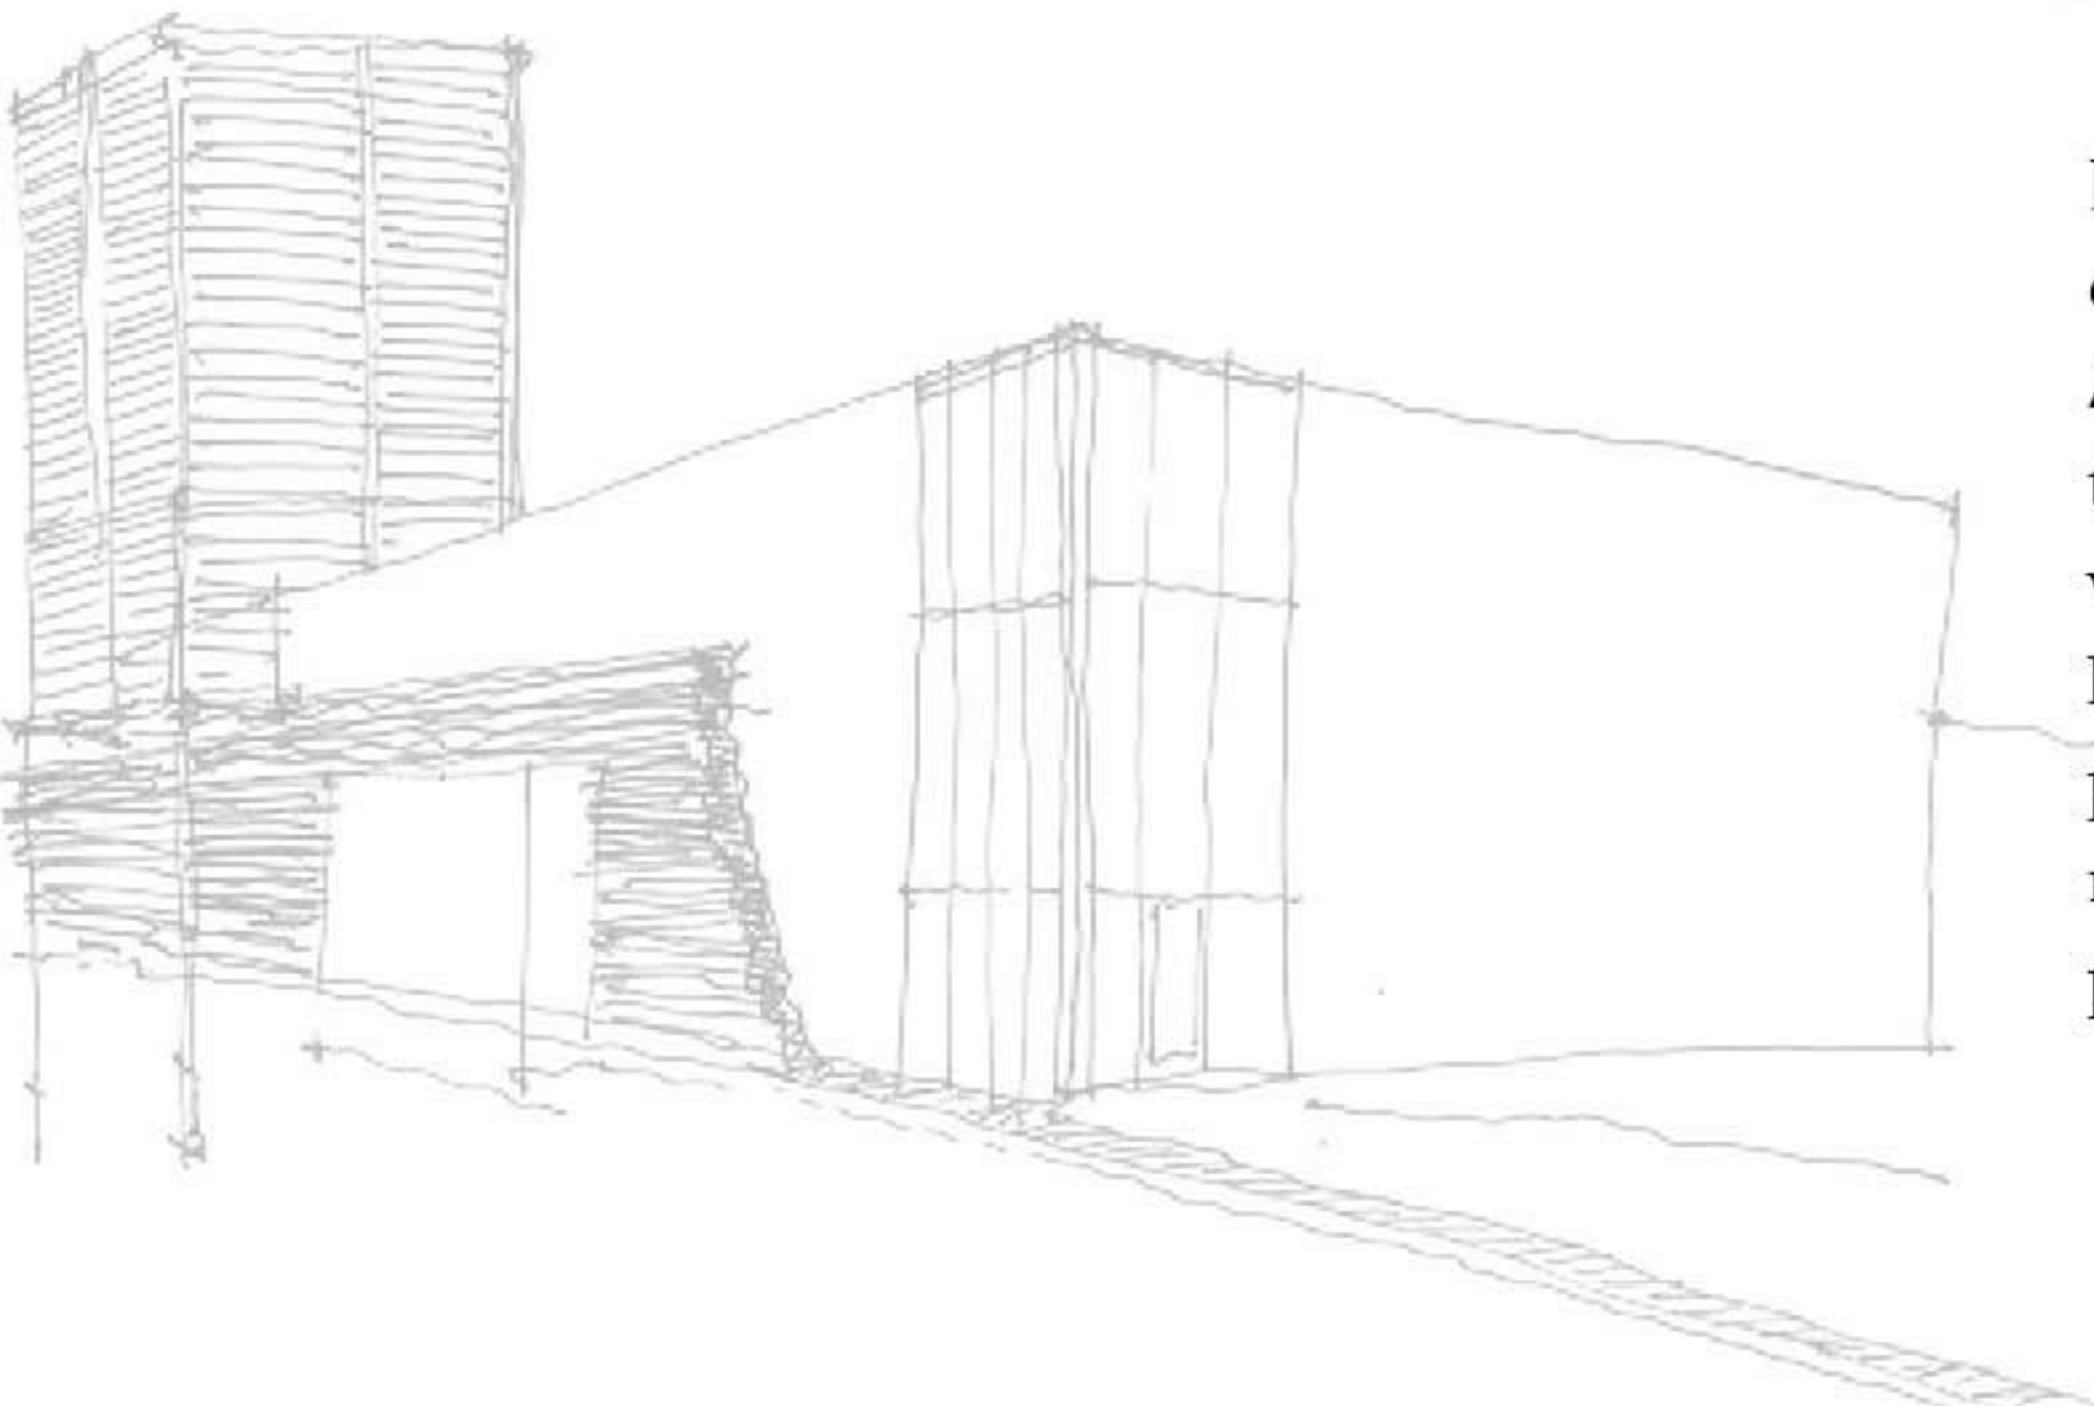

Sybaris Collection recognizes and emphasizes the individuality and delicacy of every person's taste. Being art the way we express and show our identity to others and reminder of our own value, Sybaris Collection proudly presents the **ART house** project.

“The **ART***house* project is a new concept for brand-new collectors or for those more experienced seeking to enhance their collection”

release your taste

For the experienced collectors the ARThouse project offers the great opportunity to have a digital record of their collection, thus making the managing of their collection far easier with an updated estimated value of their entire collection, as well as a digital-rendered version of their space allowing them to visualize possible purchase, exchange or sales.

For those interested in starting/
expanding a collection the
ARThouse project gives them
the opportunity to have a digital
visualization of their space, and
hence, the ability to try as many
pieces as wanted without the
necessity of waiting for long
periods just to visualize each
piece in their space.
