Sybaris Collection

Dear art lovers and collectors,

With this collection we are introducing our Sybaris Wallpaper line, where we have worked together with artists and designers to create unique designs. Our aim is to bring art in a new and original way that can give a fresh look to any space you can think of. Each artist has imprinted in their designs the look and feel of their paintings, to make deliver a work of art. For this selection, we have worked closely with Na Wei, Joshua Jobb, Santiago Pani and Karla Leyva. The result is color, texture, figures and single images to give you a wide variety you can choose from.

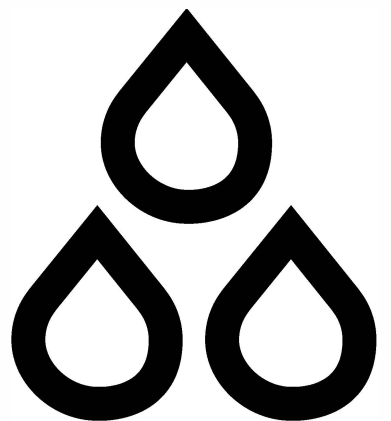

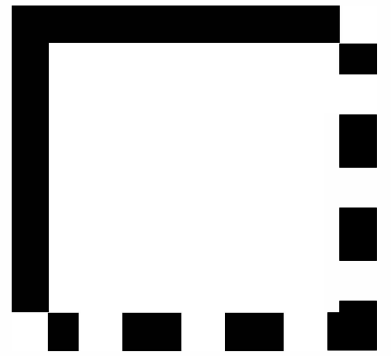

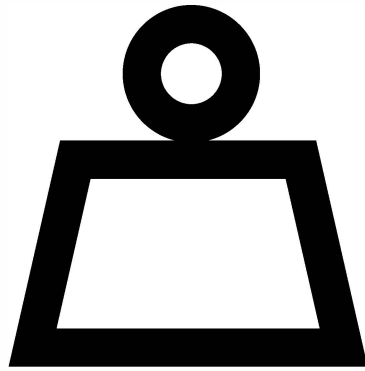

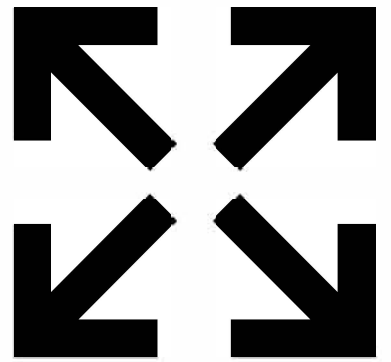

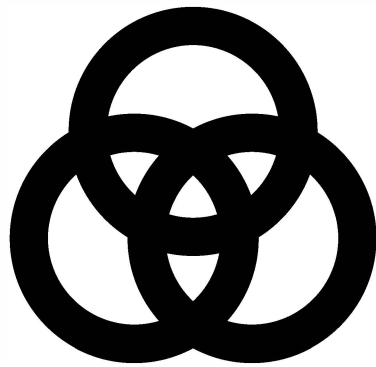

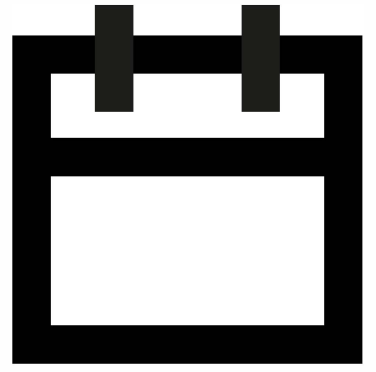

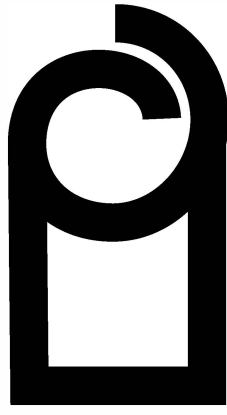

We also have worked closely with craftsmen to bring tested quality to each of our patterns and wall murals.

Get our items today by visiting our Art Store [sybariscollection.com/store](https://sybariscollection.com/store) and Amazon.

The themes that are recurrent in my work are insects, celestial bodies and portraits; the later becoming the spectators and metaphorical meeting point between the other two worlds.

Recently I have focused on the portrait series "Personal Universe", which is inspired by anonymous characters and memories of people stored in our subconscious throughout our lives and the idea that sometimes while awake and other times during our dreams, these anonymous visitors will be recalled by our minds to interact and influence our story once again.

Across his oeuvre, Na Wei has, with each new series, consistently challenged himself to make something fresh that speaks to varied aspects of society. In whatever style he finds himself working, from figuration to hyperrealism, from abstraction to surrealism, Na Wei's narratives unite personal ideology, the natural, the spiritual, and the quotidian worlds with flair.
